Topic of Threat Intelligence Sources in cybersecurity,

1. Which of the following is NOT a common source of threat intelligence?

   A) Government agencies

   B) Social media platforms

   C) Weather forecasting services

   D) Security vendors

   Answer: C) Weather forecasting services

2. Which threat intelligence source provides information about new vulnerabilities and exploits?

   A) Open-source intelligence (OSINT)

   B) Dark web monitoring

   C) Exploit databases

   D) Security blogs

   Answer: C) Exploit databases

3. What type of threat intelligence source is the National Vulnerability Database (NVD)?

   A) Open-source intelligence (OSINT)

   B) Closed-source intelligence (CSINT)

   C) Private intelligence

   D) Human intelligence (HUMINT)

   Answer: A) Open-source intelligence (OSINT)

4. Which threat intelligence source focuses on monitoring underground forums and marketplaces?

   A) Dark web monitoring

   B) Security blogs

   C) Social media monitoring

   D) Government agencies

   Answer: A) Dark web monitoring

Topic of Threat Intelligence Sources in cybersecurity,

5. Which of the following is a characteristic of Indicators of Compromise (IoC) threat intelligence sources?

   A) They provide information about attacker tactics and techniques

   B) They focus on known malicious activities or behaviors

   C) They are primarily derived from human intelligence (HUMINT)

   D) They are static and do not change over time

   Answer: B) They focus on known malicious activities or behaviors

6. Which threat intelligence source provides information about emerging cyber threats and trends?

   A) Security blogs

   B) Social media monitoring

   C) Threat intelligence feeds

   D) Government agencies

   Answer: A) Security blogs

7. What type of threat intelligence source is a security operations center (SOC)?

   A) Human intelligence (HUMINT)

   B) Technical intelligence (TECHINT)

   C) Geospatial intelligence (GEOINT)

   D) Tactical intelligence (TACINT)

   Answer: B) Technical intelligence (TECHINT)

8. Which threat intelligence source provides information about potential security incidents targeting specific organizations?

   A) Threat intelligence feeds

   B) Open-source intelligence (OSINT)

   C) Social media monitoring

   D) Security blogs

   Answer: A) Threat intelligence feeds

9. Which of the following is a benefit of using commercial threat intelligence feeds?

   A) They are free of charge

B) They provide tailored threat intelligence for specific industries

C) They are open to the public

D) They focus on geopolitical intelligence

Answer: B) They provide tailored threat intelligence for specific industries

10. Which threat intelligence source is typically generated by security researchers and analysts within an organization?

A) Internal intelligence

B) External intelligence

C) Strategic intelligence

D) Tactical intelligence

Answer: A) Internal intelligence

11. What type of threat intelligence source is the Cyber Kill Chain model?

A) Strategic intelligence

B) Tactical intelligence

C) Operational intelligence

D) Technical intelligence

Answer: C) Operational intelligence

12. Which of the following is a characteristic of threat intelligence sharing communities?

A) They are exclusive to government agencies

B) They provide real-time threat intelligence

C) They are publicly accessible

D) They focus on competitive intelligence

Answer: B) They provide real-time threat intelligence

13. Which threat intelligence source provides information about potential security vulnerabilities in software and hardware products?

A) Exploit databases

B) Threat intelligence feeds

C) Security blogs

D) Government agencies

Answer: D) Government agencies

14. What type of threat intelligence source is a Security Information and Event Management (SIEM) system?

A) Technical intelligence (TECHINT)

B) Operational intelligence

C) Strategic intelligence

D) Tactical intelligence

Answer: B) Operational intelligence

15. Which threat intelligence source is known for providing information about global cyber threats and attacks?

A) Security blogs

B) Threat intelligence feeds

C) Dark web monitoring

D) Social media monitoring

Answer: B) Threat intelligence feeds

16. What type of threat intelligence source is the Common Vulnerabilities and Exposures (CVE) database?

A) Open-source intelligence (OSINT)

B) Closed-source intelligence (CSINT)

C) Private intelligence

D) Human intelligence (HUMINT)

Answer: A) Open-source intelligence (OSINT)

17. Which of the following is a characteristic of threat intelligence feeds?

A) They provide information about potential vulnerabilities in software

B) They are static and do not change over time

C) They are exclusive to government agencies

D) They focus on geopolitical intelligence

Answer: A) They provide information about potential vulnerabilities in software

18. Which threat intelligence source provides information about security incidents and breaches?

A) Security blogs

B) Social media monitoring

C) Threat intelligence feeds

D) Dark web monitoring

Answer: A) Security blogs

19. What type of threat intelligence source is a bug bounty program?

A) Human intelligence (HUMINT)

B) Technical intelligence (TECHINT)

C) Geospatial intelligence (GEOINT)

D) Tactical intelligence (TACINT)

Answer: A) Human intelligence (HUMINT)

20. Which of the following is a benefit of using social media monitoring as a threat intelligence source?

A) It provides real-time threat intelligence

B) It focuses on known malicious activities or behaviors

C) It is limited to specific industries

D) It is a static source of information

Answer: A) It provides real-time threat intelligence

21. Which threat intelligence source is focused on analyzing and predicting cyber threats based on geopolitical events?

A) Government agencies

B) Threat intelligence feeds

C) Security blogs

D) Open-source intelligence (OSINT)

Answer: A) Government agencies

22. What type of threat intelligence source is the MITRE ATT&CK framework?

   A) Strategic intelligence

   B) Tactical intelligence

   C) Operational intelligence

   D) Technical intelligence

   Answer: B) Tactical intelligence

23. Which of the following is a characteristic of security blogs as a threat intelligence source?

   A) They focus on monitoring underground forums and marketplaces

   B) They provide tailored threat intelligence for specific industries

   C) They are publicly accessible

   D) They are exclusive to government agencies

   Answer: C) They are publicly accessible

24. Which threat intelligence source provides information about known malicious IP addresses and domains?

   A) Dark web monitoring

   B) Threat intelligence feeds

   C) Social media monitoring

   D) Security blogs

   Answer: B) Threat intelligence feeds

25. What type of threat intelligence source is a threat intelligence platform (TIP)?

   A) Human intelligence (HUMINT)

   B) Technical intelligence (TECHINT)

   C) Geospatial intelligence (GEOINT)

   D) Tactical intelligence (TACINT)

   Answer: D) Tactical intelligence
