Here are 25 multiple-choice questions on the topic of Security roles and security controls: information security roles in cybersecurity, with answers highlighted in each question:

1. What is the primary responsibility of an Information Security Officer (ISO)?

   A) Implementing security controls

   B) Managing security incidents

   C) Developing security policies

   D) Conducting security audits

   Answer: C) Developing security policies

2. Which of the following is an example of an operational security role?

   A) Security Architect

   B) Security Analyst

   C) Security Administrator

   D) Security Consultant

   Answer: C) Security Administrator

3. What is the main goal of a Security Architect?

   A) Implementing security controls

   B) Designing secure systems

   C) Managing security incidents

   D) Developing security policies

   Answer: B) Designing secure systems

4. Which security role is responsible for identifying and analyzing security vulnerabilities?

   A) Security Engineer

   B) Security Analyst

   C) Security Administrator

   D) Security Auditor

   Answer: B) Security Analyst

5. What is the primary responsibility of a Security Consultant?

   A) Implementing security controls

   B) Designing secure systems

   C) Conducting security audits

   D) Providing security advice

   Answer: D) Providing security advice

6. Which security role is responsible for monitoring and detecting security incidents?

   A) Security Engineer

   B) Security Analyst

   C) Security Administrator

   D) Security Auditor

   Answer: B) Security Analyst

7. What is the primary focus of a Security Administrator?

   A) Designing secure systems

   B) Implementing security controls

   C) Managing security incidents

   D) Developing security policies

   Answer: B) Implementing security controls

8. Which of the following is a strategic security role?

   A) Security Architect

   B) Security Analyst

   C) Security Administrator

   D) Chief Information Security Officer (CISO)

   Answer: D) Chief Information Security Officer (CISO)

9. What is the main responsibility of a Chief Information Security Officer (CISO)?

   A) Designing secure systems

   B) Implementing security controls

C) Developing security policies

D) Providing strategic security direction

Answer: D) Providing strategic security direction

10. Which security role is responsible for ensuring compliance with security policies and regulations?

   A) Security Engineer

   B) Security Analyst

   C) Security Administrator

   D) Compliance Officer

   Answer: D) Compliance Officer

11. What is the primary responsibility of a Security Engineer?

   A) Designing secure systems

   B) Implementing security controls

   C) Managing security incidents

   D) Developing security policies

   Answer: B) Implementing security controls

12. Which security role is responsible for auditing security controls and practices?

   A) Security Auditor

   B) Security Analyst

   C) Security Administrator

   D) Security Consultant

   Answer: A) Security Auditor

13. What is the main focus of a Security Analyst?

   A) Designing secure systems

   B) Implementing security controls

   C) Monitoring and detecting security incidents

   D) Developing security policies

   Answer: C) Monitoring and detecting security incidents

14. Which security role is responsible for managing security incidents?

   A) Security Engineer

   B) Security Analyst

   C) Security Administrator

   D) Incident Response Manager

   Answer: D) Incident Response Manager

15. What is the primary responsibility of a Security Operations Center (SOC) Analyst?

   A) Designing secure systems

   B) Implementing security controls

   C) Monitoring and responding to security incidents

   D) Developing security policies

   Answer: C) Monitoring and responding to security incidents

16. Which security role is responsible for training employees on security best practices?

   A) Security Trainer

   B) Security Analyst

   C) Security Administrator

   D) Security Consultant

   Answer: A) Security Trainer

17. What is the main goal of a Security Awareness Program Manager?

   A) Designing secure systems

   B) Implementing security controls

   C) Developing and managing security awareness programs

   D) Providing security advice

   Answer: C) Developing and managing security awareness programs

18. Which security role is responsible for assessing and managing risks?

   A) Risk Analyst

B) Security Analyst

C) Security Administrator

D) Risk Manager

Answer: D) Risk Manager

19. What is the primary focus of a Security Policy Analyst?

   A) Designing secure systems

   B) Implementing security controls

   C) Developing and analyzing security policies

   D) Conducting security audits

   Answer: C) Developing and analyzing security policies

20. Which security role is responsible for ensuring the physical security of assets?

   A) Physical Security Officer

   B) Security Analyst

   C) Security Administrator

   D) Security Consultant

   Answer: A) Physical Security Officer

21. What is the main responsibility of a Security Compliance Officer?

   A) Designing secure systems

   B) Implementing security controls

   C) Ensuring compliance with security policies and regulations

   D) Conducting security audits

   Answer: C) Ensuring compliance with security policies and regulations

22. Which security role is responsible for evaluating and selecting security technologies?

   A) Security Technologist

   B) Security Analyst

   C) Security Administrator

   D) Security Consultant

Answer: A) Security Technologist

23. What is the primary focus of a Security Incident Response Team (SIRT) member?

    A) Designing secure systems

    B) Implementing security controls

    C) Managing security incidents

    D) Developing security policies

    Answer: C) Managing security incidents

24. Which security role is responsible for managing access control mechanisms?

    A) Access Control Administrator

    B) Security Analyst

    C) Security Administrator

    D) Security Consultant

    Answer: A) Access Control Administrator

25. What is the main responsibility of a Security Governance Officer?

    A) Designing secure systems

    B) Implementing security controls

    C) Ensuring compliance with security policies and regulations

    D) Developing security governance frameworks

    Answer: D) Developing security governance frameworks
